## **Whitepaper**

**v1.0**

---

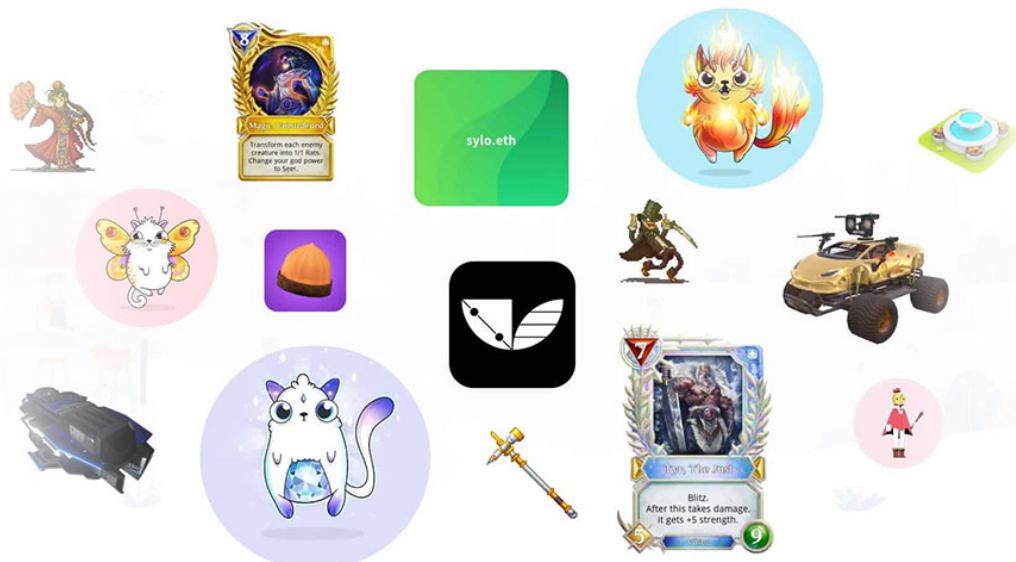

Building  
all products  
DEFI & NFT  
in one place

## I. Abstract

The strong development of Blockchain technology and the cryptocurrency market has made breakthrough growth and brought many highly applicable products in the financial sector. Therefore, Luckyswap was born with the aim of solving current problems and promoting the development of Blockchain technology by creating highly applicable products that help solve many problems in today's market.

DEFI (Decentralized Finance). The use and application of technology in financial services is not new. But our difference is to make it better, which means reduced gas fees, high transaction speeds and absolute security. And what's even more special is that Luckyswap brings completely new product sets that bring new experiences and users can profit from these products.

NFT (Non-Fungible Token) is what we chose. In particular, we build the Artwork platform and includes Market Place . where art creators are free to turn their works of art into NFTs, bring them to virtual exhibitions around the world, conduct open and transparent auctions with hundreds of millions of people art lovers in the world. Even more special is the NFT Borrowing and Equitization feature that other competitors have never had.

## III. Vision

Becoming the leading ecosystem providing DeFi and NFT marketplace and utilities to crypto users on the Binance Smart Chain platform and Other Chain, developing and optimizing applications on BSC, and becoming an ecosystem. DeFi is leading, transparent, user-friendly, and bringing the most benefits to the user community.

## IV. Problem

NFT is now a hot trend in the Blockchain market; however, it is still very strange and hard to understand to most of the people, especially traditional artists who cannot access this technology due to their expertise.

Besides, there haven't been any mechanisms bringing them closer to NFT. Digital paintings will be tokenized as NFT and sold at unbelievable prices which are not proven, causing a great problem to this new field. Organizing traditional art auctions still has many limitations such as difficulties and risks when taking paintings to the auction halls, complex procedures and processes, wasting time and money, fake paintings, payment disputation, IP violations, etc. Although there are NFT marketplaces on the same market. But poor quality NFT sets, not censored or censored unprofessional.

The name DeFi is no longer strange to the crypto community. With a growth rate of nearly x12 within 1 year, if DeFi maintains this rate, TVL in my opinion will not stop at 2.6%. It's a potential that we can easily see expansion in the near future. But the inadequacy it is facing is very high gas fees and slow transactions at peak (Ethereum in particular).

Some DeFi projects have product limitations and poor experience. Many smart contracts are vulnerable to hackers, either because they have not been audited or because their forks from other projects lead to unsafe products.

## V. Solution

With a team of skilled engineers and expertise we are confident launched products DEFI & NFT good experience and most secure.

Solve problems about DEFI, fees, transactions through BSC platform and POLYGON chain.

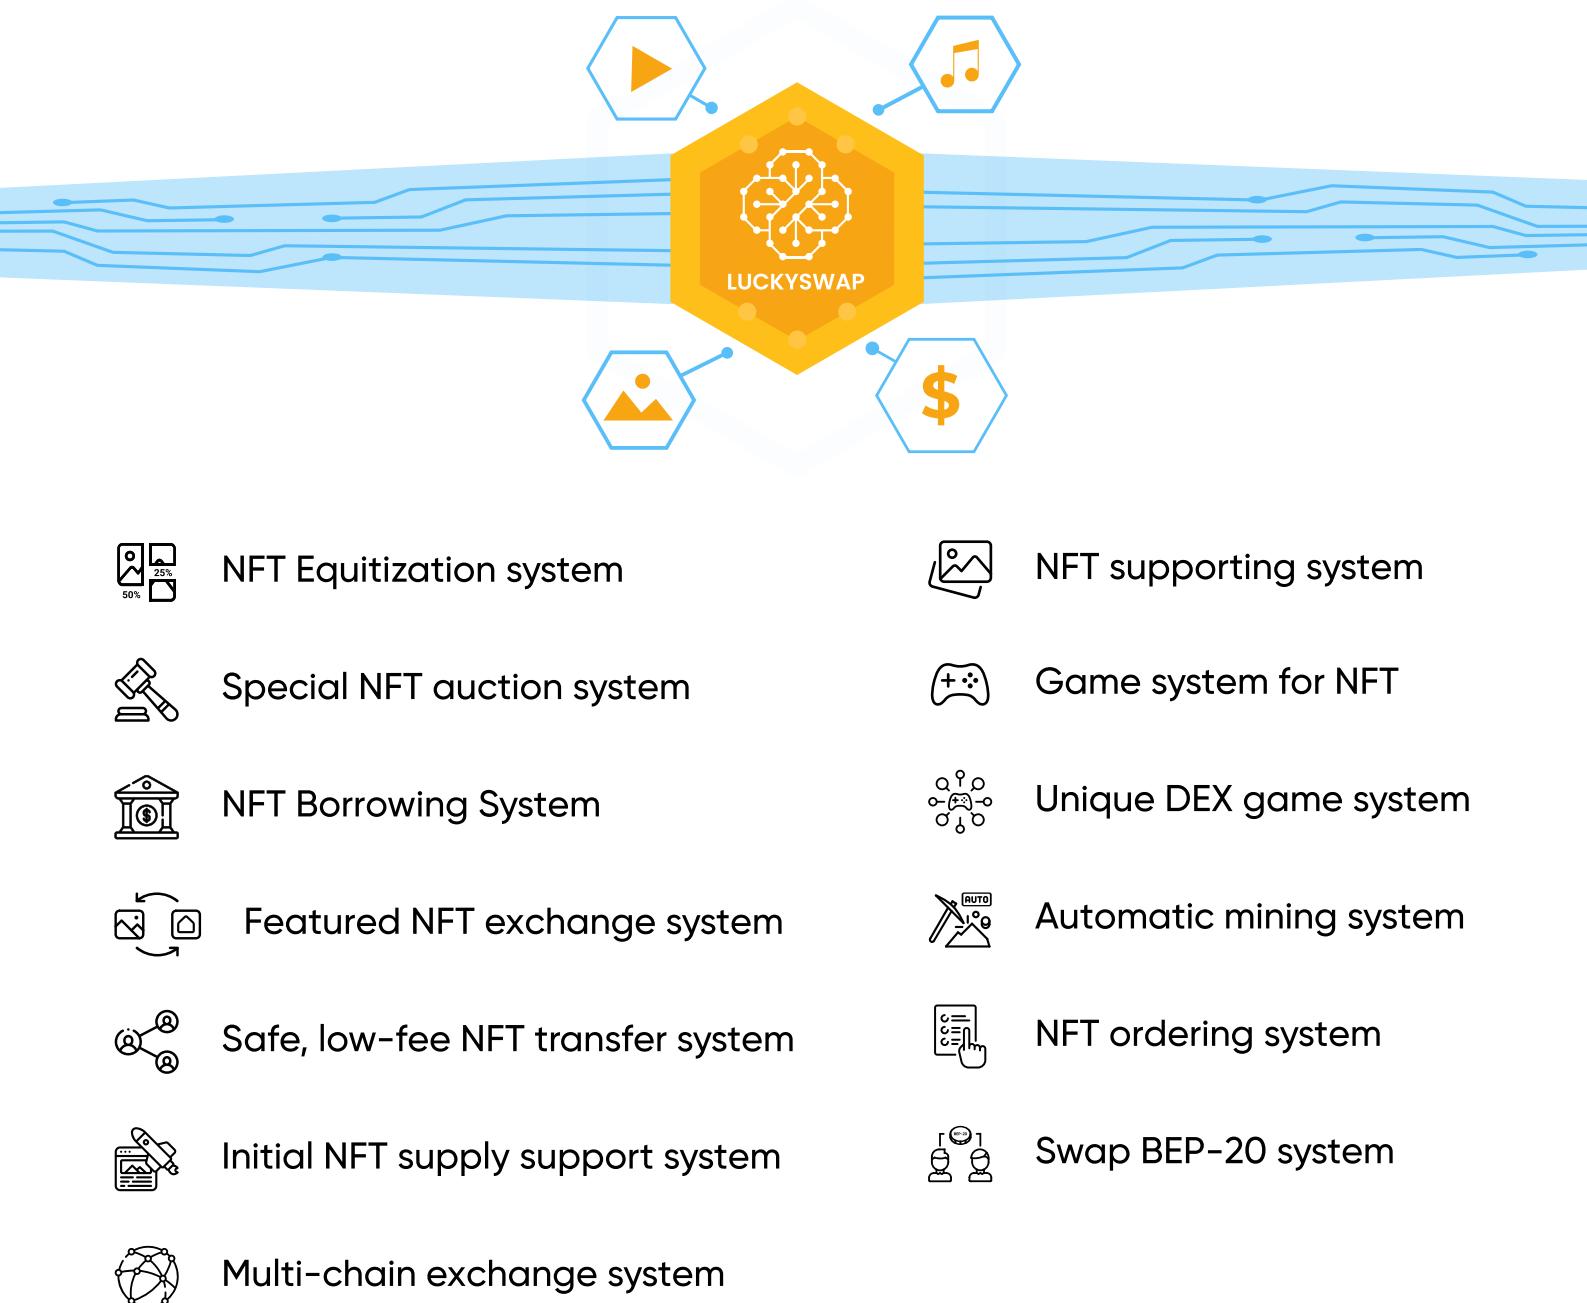

Create more rich products on the platform ecosystem Luckyswap.

Filter out the best quality works before putting on the marketplace and select the top authors in the field of 3D design, famous authors.

Luckyswap takes full advantage of the power of NFT and Smart contract for building features closest to reality. For example: buy, sell not through middlemen, swap directly, lend tokens to auction, equitize NFT, etc.

## VI. Luckyswap Ecosystem

Introducing LuckySwap ecosystem, which speaks to our vision and practice. We always see blockchain technology as the future of 4.0 era, so we want to be the pioneer to create the best features, best products, best applications for users, and blockchain is considered as core technology around our products.

## VII. Token LUCKY

Token LUCKY is a utility token in the Luckyswap ecosystem, created under BEP-20 on Binance Smart Chain.

### **Values of Token LUCKY:**

#### **Payment:**

Token LUCKY is used as the main payment means and to pay for transaction fees in the Luckyswap Ecosystem.

#### **Marketplace:**

Artists can use LUCKY for swap NFT, buy, sell, auction artwork on marketplace.

#### **Finance:**

User can use LUCKY for swap token, farming, staking get reward, launchpad, etc

#### **Voting:**

Users can use tokens to vote and evaluate NFT works in the system.

#### **Governance:**

Users have the right to vote for important changes of Luckyswap by holding LUCKY.

## VIII. Tokenomics

<b>Ticker</b>	<b>LUCKY</b>
<b>Blockchain</b>	<b>Binance Smart Chain</b>
<b>Token Standard</b>	<b>BEP20</b>
<b>Type of Token</b>	<b>Utility token</b>
<b>Total supply</b>	<b>1,000,000,000</b>
<b>Initial supply ( LUCKY)</b>	<b>43,000,000</b>
<b>LUCKY price (USD) Public</b>	<b>\$0,017</b>
<b>Initial market cap</b>	<b>\$731,000</b>
<b>Fully diluted market cap</b>	<b>\$17,000,000</b>

## Token Allocation

1,000,000,000 token LUCKY are allocated as follows:

- Seed (5%) 50,000,000: Allocated for investors in Seed Sale
- Private (10%) 100,000,000: Allocated for investors in Private Sale
- Strategic (5%) 50,000,000: Allocated for strategic investors
- Public (1%) 10,000,000: Allocated for Public Sale
- Ecosystem Growth (15%) 150,000,000: Used for marketing and other activities to develop the community and ecosystem.
- Founder (8%) 80,000,000: Allocated for founders.
- Team (15%) 150,000,000: Allocated for team members.
- Advisors/Partners (1%) 10,000,000: Allocated for strategic partners and advisors.
- Farming/Staking (20%) 200,000,000: Allocated for Farming/Staking activities.
- Liquidity (15%) 150,000,000: Allocated for liquidity provision.

## Vesting

*The vesting schedule is as follows:*

- Seed: 3 months cliff, then monthly release for 2 years.
- Private: 6 months cliff, then monthly release for 2 years.
- Strategic: 5% initially, 3 months cliff, then a monthly release for 1 year.
- Public: 30% unlock initially, 70% unlock 30 days after listing.
- Ecosystem : 1 month cliff, then monthly release for 1,5 years.
- Team: lock 6 months, then 15% per quarter.
- Advisors/Partners: 6 months cliff, then monthly release for 1 year
- Farming: Unlock after LuckySwap goes live.
- Liquidity: Unlock 15% before listing, then linear 1 year.

## IX. Roadmap

### QUARTER I/2021

Completion of the LuckySwap website, whitepaper, and Smart Contract.  
Release LuckySwap Exchange (Beta).  
Release LuckySwap / Staking (Beta).  
Release Launchpad (Beta).

### QUARTER II/2021

Smart Contract Security Audit  
Token Seed sale, Private sale, and Public sale.  
IDO & listing to Pancakeswap  
Launching Launchpad  
Launching Farming/ Staking  
Launching Exchange  
Launching NFT Marketplace

### QUARTER IV/2021

Integration ecosystem on Polygon, Polkadot.  
Research and build CHAIN for ecosystem LuckySwap  
Launching app LuckySwap iOS/Android

### QUARTER III/2021

Launching NFT Borrow and NFT Equitization  
Launching LuckySwap Finance V2  
Release node Validator on BSC

### QUARTER I/2022

Launching NFT V3 & Multi Chain  
Launching NFT V3  
Launching combo LuckySwap Finance on MultiChain.

### QUARTER II/2022

Building scalable organization, risk management, and compliance framework.  
Release Private Transactions  
Launching wallet LUCKY.
